Levi "Eli" Oniszko

Systems Administrator | Microsoft 365 & Infrastructure Specialist

Tucson, AZ | 520.906.4889 | loniszko@mainframetech.us | linkedin.com/in/loniszko

PROFESSIONAL SUMMARY

Systems Administrator with 6+ years of experience across Microsoft 365, Windows infrastructure, endpoint management, and enterprise automation. Showed leadership that moving Microsoft 365 licensing to direct billing would have cost over $100,000 more every year, and was recognized with an out-of-cycle merit raise within the first four months. Led a Windows 11 migration across 1,200+ machines at 48 locations and built PowerShell-driven deployment workflows that cut provisioning time from 2 hours to 15 minutes. Now a Senior Escalation Engineer on a managed services provider's NOC and escalation team. Experienced in regulated healthcare environments, IT standardization, and senior escalation support across infrastructure and end-user systems.

PROFESSIONAL EXPERIENCE

Remote Senior Escalation Engineer | **Sentry Computing** | Remote *Jun 2026 to Present*

Managed services provider | NOC and escalation team | Placed through CampusPoint Jun 2026 to Sep 2026, hired full-time Oct 2026

- Engineer on the NOC and escalation team, handling RMM, EDR, backup, and Microsoft 365 escalations
- Hired full-time out of a contract-to-hire placement ahead of the original six-month term
- Worked P1 incidents through a structured response process, from first response to post-incident review
- Contributed to an internal firewall hardening project across WatchGuard, FortiGate, and UniFi, building the configuration inventory and running the cross-platform analysis
- Documented an endpoint remediation procedure in the team knowledge base

Systems Administrator | **Arizona Community Physicians** | Tucson, AZ *Jul 2024 to Jan 2026*

Arizona's largest physician-owned medical group | 50+ clinic locations, 800+ employees | HIPAA-regulated environment

- Showed leadership that moving Microsoft 365 licensing from the reseller to direct billing would cost over $100,000 more every year, and documented 100+ unassigned E1 and E3 licenses for reduction at renewal; recognized with an out-of-cycle 8% merit raise and performance bonus within the first four months
- Led enterprise Windows 11 migration across 48 medical sites, deploying 1,200+ machines with zero disruption to clinical operations
- Built a PowerShell automation suite integrated with SmartDeploy and WDS that reduced per-machine deployment time from 2 hours to 15 minutes (87%)
- Led OneDrive migration for all staff from on-premises mapped drives as part of an organization-wide SharePoint and OneDrive modernization effort; assisted with SharePoint migration and produced end-user training videos using Clipchamp and Microsoft Sway
- Designed user termination workflow enforcing immediate session revocation, license reclamation, and data preservation, standardizing a previously inconsistent manual process
- Administered Sophos Email Security end-to-end: policy management, quarantine workflows, mail flow controls, and escalation coordination with Exchange Online
- Served as the designated Microsoft 365 SME: Exchange Online, Teams, SharePoint, OneDrive, Entra ID/Azure AD, and user and license lifecycle management
- Managed Veeam Backup for Microsoft 365 covering Exchange, SharePoint, and OneDrive with tested recovery procedures; assisted with enterprise storage migration from Pure Storage to TrueNAS as part of broader infrastructure modernization
- Implemented automated BIOS asset tagging and site-based computer naming standard across all 48 locations; integrated with Snipe-IT for real-time inventory tracking
- Served as senior escalation resource for helpdesk, resolving complex infrastructure, endpoint, and Microsoft 365 issues beyond tier support scope

NIST Engineer (Network Infrastructure & Escalations) | **InTegriLogic** | Tucson, AZ *Oct 2023 to Jul 2024*

Healthcare-focused MSP | 80+ clients across medical, legal, financial, and nonprofit sectors

- Handled complex ticket escalations as part of the network infrastructure team across diverse multi-client environments
- Administered Sophos security stack for multiple clients; earned Sophos in-house certifications

- Evaluated Microsoft 365 Lighthouse and Privileged Identity Management for prospective client deployments
- Delivered remote and on-site support across healthcare, legal, financial, and nonprofit environments; maintained least-privilege access discipline throughout

IT Director | **Old Pueblo Community Services** | Tucson, AZ *Apr 2022 to Aug 2023*

Nonprofit human services organization | Built the organization's first internal IT department

- Promoted from Lead SysAdmin to IT Director within two weeks based on immediate technical impact and ownership
- Implemented SmartDeploy and WDS imaging infrastructure on Hyper-V and Windows Server 2022, cutting machine build times from 2+ hours to under 20 minutes
- Led VoIP platform migration to GoTo Connect; managed IT budget, vendor relationships, and compliance-related coordination

Systems Administrator Technician | **La Frontera Arizona** | Tucson, AZ *Nov 2021 to Apr 2022*

- Active Directory administration, Group Policy management, and infrastructure support in a HIPAA-regulated behavioral health environment
- Served as escalation resource for end-user support and infrastructure incidents

IT Engineer | **Technology Solutions** | Tucson, AZ *Feb 2020 to Jul 2021*

- Systems administration, networking, and end-user support across small and mid-sized business environments
